

TECHNOLOGY & CORE SYSTEMS

CAPABILITY PROFILE

Technology is a tool. We'll help you use it the right way. When we work with IT leaders, CIOs, COOs, and the management teams of re/insurers, brokers and the MGAs, we typically ask two questions: 1. What do you do? 2. How do you do it?

For insurance organizations, the answer to #1 is write insurance. The answer to #2 is, in part, with technology.

In that context, technology is a tool you use to deliver products and services to your policyholders. And we can help you use it more effectively. Here's how:

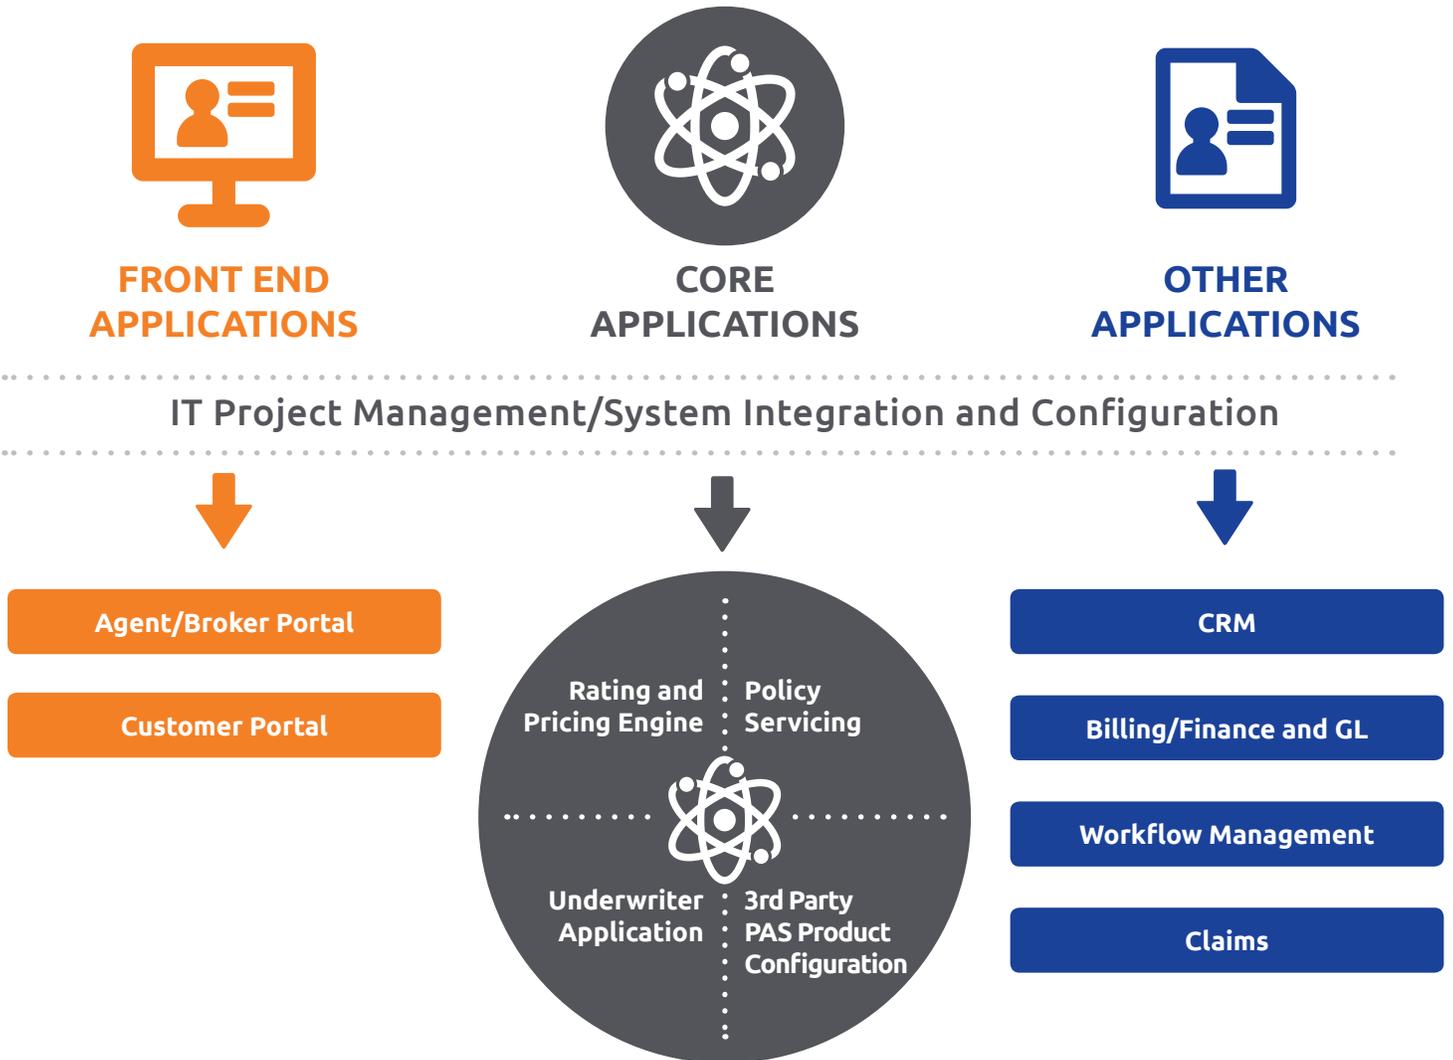

THE SWISS ARMY KNIFE

Because technology is capable of doing so many different jobs, we're capable of helping you no matter how you use it.

Some of those ways include:

- › Application design and development
- › Product design, configuration and distribution
- › Proprietary and legacy system configuration and enhancements
- › Platform alignment and optimization

Xceedance Supports Technology Across the Insurance Value Chain

From distribution platforms to rating and pricing engines, from policy and claims administration systems to accounting and billing systems, from data warehouses to enterprise applications/websites, we design it, develop it, test it, deploy it, maintain it, and take accountability for our work.

Among the tools and technologies we use and with which we're functionally proficient are:

- > Advanced JS
- > MSBI
- > Salesforce
- > Angular 4
- > PHP
- > SCM
- > AINS
- > PMP
- > TOGAF
- > CSTE
- > POWERBI
- > Tableau
- > Microsoft.net
- > QlikSense
- > Web API

VALUE IS WHERE YOU CREATE IT

To maximize the value we provide to your organization, **YOUR WAY IS OUR WAY.**

- > We provide strategic guidance and direction to all requisite project teams
- > We monitor and manage tactical activities down to each team member and task
- > We monitor and measure the operational effectiveness of every project

Our greater value lies in our abilities to develop tailor-made applications to support your functional/business needs; to support, maintain and customize your existing applications; to implement new applications; and to manage any or all of your IT-related projects.

Distinctive Value and Impact

UW PERSONAL LINES

Developed and deployed a custom insurance rating and pricing engine with an integrated decisioning engine
